

18th Annual Capital Link International Shipping Forum | 1X1 Discussion

March 20, 2025

"Building An Industry Bellwether Energy Transition Shipping Company"

Jerry Kalogiratos, CEO – Capital Product Partners L.P. (CPLP)

Ben Nolan, Managing Director, Energy & Power, Transportation – STIFEL

The discussion highlights CPLP's strategic transformation from a product tanker-focused MLP to a diversified fleet, including LNG carriers, liquid CO₂ carriers, and ammonia carriers. The transition to a C-Corporation reflects its alignment with evolving market demands and its focus on becoming a leading shipping provider for the energy transition. Supporting industries like LNG, carbon capture, and green hydrogen, CPLP is poised to capitalize on future growth opportunities in emerging markets such as liquid CO₂ transportation and ammonia shipping.
